

ERIC MOYNIHAN

Cork, Ireland | eric@moynihan.io | <http://linkedin.com/in/eric-moynihan> | <http://github.com/ericm>

Education

University College Cork

BSc Computer Science, 2018 – 2022

Year 1: 1st Class Honours; Year 2: 1st Class Honours

De La Salle College Macroom

Leaving Certificate, 2012 - 2018

7 Higher Level Subjects. Results: 2xH2 2xH3 2xH4 1xH5

Experience

Google, Intern

Jun 2020 – Sep 2020

- Part of the B2 Internal Edge Network Site Reliability Engineering team
 - Worked on an open source project called gNxl (<https://github.com/google/gnxi>), a set of services used to provision network devices using an open vendor neutral specification :
 - Managed project workflow with co-intern by splitting up tasks between us using GitHub Issues
 - Stayed consistently ahead of schedule, allowing for stretch goals such as an Angular Web UI
 - Extended the mock target to implement the gNOI Factory Reset gNOI service
 - Created a client that implements the gNOI OS Service
 - Created an orchestrator to execute and validate tests on a gNOI and gNMI target with my co-intern
 - Increased test coverage in the repository by over 15%
 - Refactored the certificate management library to be more customisable and readable
 - Made >45 Pull Requests to the repository
-

University College Cork, Staff IT Service Desk

Jun 2019 – Present

- Help Staff Part Time with issues regarding their PCs and officially supported software
 - Log cases using our Triage system and explain in detail issues that need to be expedited
-

University College Cork, Lab Demonstrator

Sep 2019 - May - 2020

- Demonstrated for 3 modules: Introduction to Programming , Systems Organization 1 and Computer Systems
-

Rock Bingo, General Staff

APR 2019 - SEP 2019

- Called numbers on stage in linked pongo, collected customers tickets and provided change
-

Activities

UCC Netsoc, Systems Administrator

2020 - Present

- Work on our core [infrastructure as code](#) service which enables us to provide free hosting to all UCC students
 - Created/contributed to products such as a [Discord Bot](#), a [website](#) and a [developer environment](#)
-

IBM Cork CoderDojo, CoderDojo Mentor

2014 - Present

- Mentored a full class for Advanced Web Development, teaching them backend and JavaScript frameworks.
-

Some Of My Skills

Backend: Go, Python, Node JS, Java, MySQL, NoSQL, Firebase, Networking, Docker (Swarm) | **Frontend:** TypeScript, JavaScript, React, Angular, React Native, HTML5, CSS3 | **Productivity:** Git, GitHub, Ansible, Linux, Figma

Some of My Personal Projects

Stonks

<https://github.com/ericm/stonks>

- Stonks is a terminal based stock visualizer and tracker that displays real time stocks in graph format in a terminal. Made in Go.

Yup

<https://github.com/ericm/yup>

- Arch Linux AUR Helper with ncurses functionality and better searching and sorting. Made in Go.

Newlogic

<https://github.com/ericm/newlogic>

- A Circuit Builder / Logic Design Desktop Application (like mmlogic) made with Electron + React Typescript. It's currently compatible with Windows, Mac and Linux. Made with TypeScript/Electron.

Py The Way

<https://github.com/py-the-way/py-the-way>

- This project is a recommendation system that recommends where a user should live in the US using big data, python and pandas. It was originally made for a hackathon where it came first place.
